The Arizona Central Bank of Flagstaff has sold up to the present time almost \$400 worth of revenue stamps. As this bank cashes on an average of 300 checks daily, the government is realizing fully \$6.00 per day from this institution alone. In this connection it may be well to remind the public that the one who makes out a check and not the one to whom it is drawn, is required to attach a two-cent revenue stamp to the same. No additional charge is made for drafts at the bank on account of the revenue law, and those wishing to make remittances by mail can do so by bank draft cheaper than by postoffice or express order.
